

Embark on Your Celebrity Alaskan Adventure this Fall

Did you know FALL is the BEST time to see Alaska?

- **WEATHER-** Mid-day temperature average ranges between 55-65 degrees. End of August through beginning of September has dry air, which means no rainy days.
- **WILDLIFE-** During this time period, wildlife graze in the coastal lowlands. Bears are fishing for salmon in the open. Seals and whales are at their peak, allowing you more enjoyable sightings.
- **VIEWS-** Snow-capped mountains are spectacular and more visible, making it the best opportunity to see Mt. McKinley (a.k.a. Mt. Denali). There's also spectacular foliage, stunning fall colors and incredible Northern Lights views.
- **TIMES-** The Alaskans and the employees in the hotels at the sites are excited and happy to serve our guests before the end of the season. They go above and beyond the call of duty to accommodate our guests' needs. End of season also means great shopping discounts for guests.
