XCELERATE

High-speed Internet at Sea

Now your clients can browse and stream faster.

When your clients book with us, the excitement moves at their own pace. But when it comes to their Internet experience, we're speeding things up with Xcelerate high-speed Internet at sea. Now clients can share memories with video calling and messaging like Skype and Facetime, browse web sites faster, and sit back with their favorite movies or shows with streaming video capability.

And now, we've improved the program, so you can connect up to four devices on one account, allowing you to instant message family and friends on board throughout your cruise. Currently available on Celebrity EquinoxSM, Celebrity Reflection[®], and Celebrity Constellation[®].

XCELERATE PLANS
